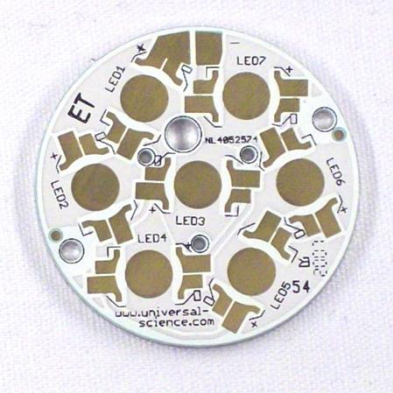
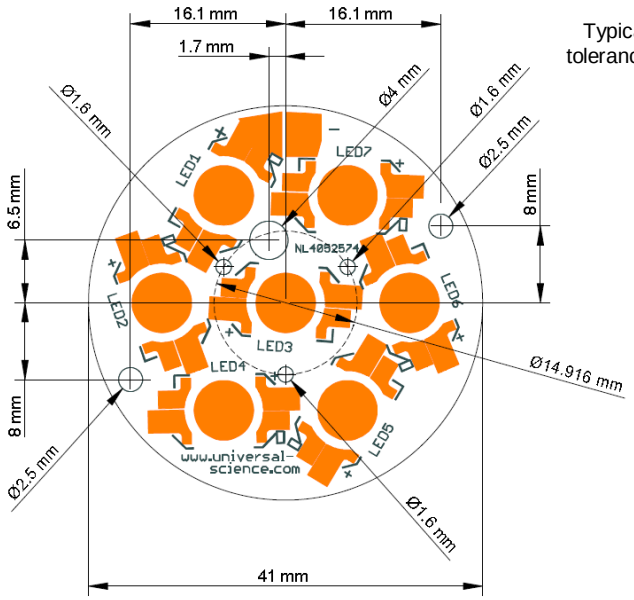
MCPCB for 7 Cell Optic – Part No. 174



- **Compatible with all POL 100 series 7 Cell Cluster optics – 122, 125, 130, 140**
- **The 174 MCPCB is designed to accommodate a wide number of LED types including:**
  - **Luxeon I type packages**
  - **Seoul Semi P3, P4**
  - **Avago ASTM-Axxx**
  - **Edison Edixeon series**
  - **Osram Dragon types**
  - **Cree XR, XR-E, XR-C**
- **174 MCPCBs can be provided by POL to support customer prototyping and luminaire production.**
- **Manufactured by Universal Science using Unilam substrates.**
- **Can also be supplied in panel format ready for automated assembly – please enquire**
- **Part of the Polymer Optics "Modular LED Optics"® range**



Typical dimensional tolerances to +/-0.2mm

In order to determine if the particular performance of this part is suitable for your application with your chosen LED type, POL suggests that you obtain samples from POL or their distributors for your own product testing, as properties may vary with different LED types.

Due to continuous product improvement, POL reserve the right to change specifications without notice.
